

LIVING BRANCHES

Live & Grow – Together

Living Branches is committed to helping residents and community members live lives of purpose and joy—no matter the circumstances. For many people, Alzheimer’s and other dementias severely inhibit the ability to experience God’s gifts.

This year, Living Branches begins an initiative to discover the best that medicine, academic research, therapists, international practices, church families, and caregivers bring to those living with dementia. Progress has been made in discovering therapies, treatments, and best practices to treat the symptoms of dementia. We want to bring the best of those to our residents, their families, the conference, and the Indian Valley community.

We are excited about this new initiative, which supports the genuine, compassionate, and loving care that flows between our residents, their families, and our staff. We covet your prayers, as this circle of care unites us.
